27B	70	140	190	240
327B	140	220	290	350
39A	150	290	390	400
39B	170	320	400	400
41A	150	250	330	400
41B	150	250	330	400
94B	50	60	80	90
L107A	50	70	90	100

Notes: 1) These setback distances are only for the situation where a drainage system will be installed and the landowner wishes to avoid impacting the wetland hydrology. 2) These values assume the ponded water on the site is 0.25" or less. 3) The effective depth of the drain (ditch or tile) is the elevation difference between the ground surface at the approximate setback distance and the water surface in the drain, or the bottom of the drain if it typically has no standing water.
